2. About

This document is about writing a user story for an online Web shop ordering system for a Boutique. Currently we would have a customer user story and a manager user story. Each story has different goals/ task.

3. Description

I am Online Web shop for Boutique, where customer can view products according to their prices, sizes and quantity in the shopping Cart. And then place an Oder, related to their selected items in the shopping cart basket. But before then, they must do the necessary procedures, by registering their credentials and then Login to view, select and make an order on the website.

4. Appendix

For priority from scale 1 to 100. 1 being not that important. 100 being very important.

For estimation point from scale 1 to 10. 1 being, it will take short time to make it. 10 being, it will take a very long time to make it.

5. User Story

User story 1:		
Estimation	2	
point:		
Priority:	61	
User story	As a customer.	
	I can sign up.	
	So that I can store my information.
