Contents

1. Project goal

The goal of the project is to deliver a working website. Every sprint consists of 3 weeks. In these 3 weeks there are requirements that I have to deliver. This project is to also show that I am improving on each sprint and show that I know how to do the new stuff that is asked.

2. About

This project is about creating a website for Web shop for Boutique Fashion. The website name is Called Gracious Fashion Boutique, that has Various Brands Like Gucci, Versace, Nike, Puma, Adidas, Lacoste together with their Collections of Clothes, Sneakers, Short and Long Sleeves, Jeans Pant, Shoes, Bags, and Also Some Collections of Perfumes.

But, First of all, before they can place an order for these Products, they must Register and Login with their Credentials (full Name, Username, email, Password and Address), and Then Login to View and Placed an order of that Particular Products of their choice (searching for product name and Brands)..And Then Paid for the Products which they purchased, . A Receipt has been sent to them through their email including all Total Costs of the Products they purchased.

I will be Creating three Role of Users Namely: Customer, Admin/Sales Manager, and Manager

2.1 Admin:-

1 Admin can also Make a Request from the Store/Warehouse manager, whenever there was a less stock from the Depot.
2 Update Products, if Found some Products has been Outdated.
3 Remove Products if there is no profit for that items
4 Managing all customers Information's.
5 Monitory Stock Inventory and Purchases of New Products from the Warehouse.
6 Oversees business of Operations in the Company.

2.2 Sales Manager: -

1. Keep Track of all Products Purchased by customers for that Particular Day,
2. Present sales, Revenue and Expenses reports and realistic forecast to the management teams. (Admin, Manager).
3. Gives Updates to Admin, if there is any Complain from Customer regarding their Products, or wrong credentials
4. View Customers 's Feedback, on what to Improve on the Business.
5. They also handle customer's Complains
6. Total Products Purchased by Customers.

2.3 Warehouse Manager: -

1. Keeping track of Products going in and out from the warehouse.
2. Approving or Decline Orders from Admin
3. Placed Orders from the Suppliers if there is Less Stock.
4. Oversees, receiving, warehousing, distribution and maintenance operations.

2.4 Manager: -

1. Receives General Overview of Reports from Sales Manager, Concerning Total sales, Revenues and Profit Generated at a particular point in time e.g.(Weeks, Months).
2. Receiving Information About the Business Operation, if Businesses is Generating more financial stature or not

2 Strategy

The agile method that I'm going to use is called scrum, where each spring you deliver some code and keep update the project and show some improvement. It a better way of working because you will get feedback during those sprints, and you can update the project base on the feedback.

3 Project planning

A.   Phasing

1. Analyzing the project – Need to analyze on how to make the project and if there would be any problem.
2. Documentation with planning – Need to document how to start and how the process should go.
3. Setup environment – Need to setup a place to store the project like git.
4. Development – Coding for the project.
5. Core sprint – Continues integration for the project.
6. Unit test – Test out the code if there is any error.
7. Wrap up – finishing up the whole project.

B   Time plan and milestone

Phasing	Start date	End date
Analyzing the project	29 Aug 22	16 Sep 22
Documentation with planning	29 Aug 22	16 Sep 22
Applied Research Document	17 Sep 22	07 Oct 22
